

FRONTIERS IN NEUROLOGY, NEUROPHYSIOLOGY & NEUROPHARMACOLOGY

7TH INTERNATIONAL STUDENT CONFERENCE

POZNAŃ, COLLEGIUM ANATOMICUM
6 ŚWIECICKIEGO STREET
LECTURE HALL RÓŻYCKI

CLICKMEETING

9.00 AM Opening of the Conference - prof. dr hab. Małgorzata Kotwicka

9.15 AM - 12.00 PM Expert Session

9.15 dr n. med. Jeremi Kościński, prof. dr hab. n. med. Juliusz Huber, dr n. med. Jakub Moskal, dr n. med. Przemysław Daroszewski
Intraoperative Neurophysiological Monitoring during surgical treatment. Real-Time Neuromonitoring. The voice of neurosurgeon, neurophysiologist and the health care manager.

10.30 płk dr n. med. Jacek Furtak
The role of stereotactic biopsy in the diagnostics of brain tumors.

11.00 prof. dr hab. n. med. Jacek Losy
Does primary progressive MS have the same immunopathogenesis as RR/SP MS?

11.30 dr hab. n. med. Paweł Sokal
New methods and paradigms of invasive neuromodulation in neurogenic pain.

12.00 PM - 12.30 PM Coffee Break

12.30 PM - 5.00 PM Student Session
(10 mins per participant + 5 min discussion)

12.30 Bartłomiej Czyżniewski
Neurostimulation as a possible therapeutic method in patients with long-COVID neurocognitive problems.

12.50 Maria Derkaczew and Victor Böhmeke Picallo
70-year-old patient with hyponatremia mimicking ischemic stroke – a case report.

1.10 Magdalena Chrószcz
Functional polymorphism of the μ opioid receptor.

1.30 Eryk Wacka
BDNF, acute ischemic stroke and poststroke depression.

1.50 Brandon Bujak
Chemotherapy-induced neuropathy (CIPN).

2.10 Chanika Assavarittirong
Severe Raynaud's phenomenon in the course of systemic sclerosis – vascular and neurologic background.

2.30 Shamiram Samantha Benjamin and Tsz Yuen Au
A clinical application for Hindenberg's blimp; hydrogen in the treatment of brain injury.

2.50 PM Lunch Break

3.00 Natalia Bartosik and Maria Dobielska
Can microbes save us from cognitive impairment in neuropsychiatric diseases, especially depression?

3.20 Milena Witkowska
May addictive stimuli modulate adult neurogenesis in the nucleus accumbens?

3.40 Alicja Maziarczyk
Monoclonal antibodies blocking CGRP for prevention of migraine.

4.00 Dorota Bejga and Julia Kwaśniak
Issac syndrome - case report.

4.20 PM Hanna Nikanava
The role of nerve growth factor in controlling anxiety-related and stress-related behaviors.

4.40 Barbara Folga
A boy with newly described TUBB3 R262H syndrome.

5.00 PM Jury Discussion

5.30 PM Summary and Closing of the Conference
